Circulation Accessories for Checkout

**Bookcheck Unit Model 942-Series**
These units save time and space while helping to ensure reliable processing. The Model 942 effectively desensitize and resensitize Tattle-Tape™ Security Strips on print materials, CDs and DVDs. **$3425–on counter Shipping included (includes 15 month service); In counter add $120**

**Desensitizer Model 763**
This portable, table-top unit provides fast and efficient desensitization of Tattle-Tape™ Security strips on audiocassettes and videocassettes. **$378 plus shipping $10**

**Desensitizer Model 930**
This fast, efficient device adapts to virtually any check out configuration and is ideal for high-volume check out-only operations. It safely desensitizes security strips on print materials, CDs and DVDs. **$295 plus shipping $10**

**Hand Held Desensitizer Model 766**
This hand-held device rapidly processes non-print media at check out. Simply pass the unit over the security strip, and it’s safely desensitized. There’s no need to remove cassettes from their cases. **$325 plus shipping $10**

Circulation Accessories for Check-in

**Resensitizer Model 764**
This electrical portable unit fully resensitizes Tattle-Tape™ Security Strips on print material, CDs and DVDs, ensuring a fully secured collection. A green light signals that the unit is operating. **$1190 plus shipping $20 (includes 15 month service)**

**Resensitizer Model 2011**
This portable tabletop device resensitizes Tattle-Tape™ Security Strips on audiocassettes and videocassettes, and is completely safe. Security strips are resensitized in one pass. **$378 plus shipping $10**

THE RED TAG DISC MEDIA PROTECTION SYSTEM

Create a more human library

Lock in a higher level of security

As one of the most innovative disc media solutions available today, the Red Tag system is a simple, cost-effective way to protect your entire disc media collection. This secure solution eliminates the need to store a disc separately from the case. It’s also very easy to use, so staff can spend less time handling discs and more time providing personal service. The disc is locked in place simply by inserting the locking tag into a case and passing it under the hub of the disc. At checkout, the tag can be removed in seconds. Each tag is reusable and extremely durable, reducing costs and providing the level of security you need.

Easy to Use
• Simple to implement
• Reduces transaction time

Enhances Productivity and Customer Experience
• Eliminates the need for storing discs separately from the cases
• Reliable method of protection reduces theft and helps ensure that discs are available when customers want them
• Compact components allow for multiple checkout options

Reliable Security
• Protects against disc media theft
• Dual function locking tag secures one disc to the case and keeps the case locked
• Compatible with other 3M disc media solutions like 3M™ Tattle-Tape™ Security Strips DCD-2 and 3M™ RFID Tags.
• Includes a lockable Red Tag De-Tagger

Pricing and ordering information on the next page!!

In Stock, Ready to ship!!
The proven Red Tag system is simple to implement and works in conjunction with standard DVD and CD cases. A red tag inserted into the media case locks the disk onto the case and locks the case closed. Only the special unlocking device can quickly and easily remove the red tag and free the disk for library customers.

Symbology, Inc. will quickly and economically meet your library label needs. From item labels to CD/DVD labels to label protectors, we'll create your ideal label. To each label project, we bring our 28+ years of bar code experience. Trust Symbology to save you time and money.
Overview

Computype library labels have been used in libraries for over 30 years. Our expertise started with barcode labels for books, magazines, assets, etc. Today we offer a wide variety of library labels and label printers including pre-printed barcode labels, spine label printers, spine labels, CD/DVD labels, patron cards, and other forms of label printers to help libraries keep track of their collections. We’ve worked closely with libraries big and small around the world to help make their labeling process more efficient.

Why libraries like working with Computype:

- Benefit from over 30 years of library expertise and responsive customer service.
- We maintain the library’s sequence history and prevent duplicates.
- Order small quantities in just one week.

Barcode Labels

Our High Performance Barcode Labels are printed with our DigiTek process using a high quality archival label material and an aggressive 2 mil adhesive that will bond to all common library surfaces. A heat seal over-laminate is also used for added image protection and provides a permanent bond to the label material. We can also add color to your labels at no additional charge giving you the ability to color-code such things as a particular branch in your library system.

</tr>
</tbody>
</table>
Stock Types

The choice of sheet or roll stock does not affect price, although it does impact minimum order size.
• Sheet stock and roll stock labels are priced the same on a per label basis. Do not mix an order. Only one type of stock per order.
• Sheet stock is 11.75 X 8.0 inches.
• The minimum order for sheet stock is 3,000 labels. Any order quantity for sheet stock above 3,000 is acceptable.
• Format 5700 on sheet stock, is in landscape format with six labels across by 12 labels down, or 72 per sheet.
• Format 5600 on sheet stock prints with 48 labels per sheet.
• Format 5700 is produced in rolls of a thousand labels. Format 5600 is produced in rolls of five hundred labels.
• Format 5700 labels requested on roll stock must be ordered in multiples of 42,000 labels (for example: 42,000; 84,000; 126,000). This is a requirement because the printing process actually prints a roll 42 labels wide, which is then slit into 42 rolls of a single label width.
• All Roll Format labels must be ordered in multiples of 27,000 labels (for example: 27,000; 54,000; 81,000).

Custom Labels

Custom labels are also available in Codabar, Code 39 and Code 128. Options include adding art such as an image of the library building, or logo and colored paper or printing. Author / Title / Call number information can also be accommodated on “smart labels”. Naturally, customization requires a custom quote, and in some cases, the library will have to supply a sample data file.

Prices per piece for new formats/layouts will not change as long as the overall label size stays the same. However there is a one-time $250 setup charge for custom design/art/layout.

Shipping

• Shipping is by FedEx Three Day service directly from Computype to the library. Be sure to provide a shippable address. No P.O. Boxes please.
• Shipping costs are additional.
• The average weight per thousand labels of Format 5700 is 0.75 pounds.
• Allow approximately $10.00 per 10,000 labels for shipping.

Traf-Sys OmniCounter People Counters are designed to provide an affordable highly accurate wireless people counting solution with flexible mounting options. These counters can be mounted at the entrance of your facility to measure pedestrian traffic statistics. With features such as lithium ion battery power and wireless communication, these counters can be installed quickly and easily.

The Traf-Sys OmniCounter has unique features which allow it to be configured for either front-firing or side firing installations and unidirectional or directional counting. This makes the Traf-Sys OmniCounter flexible enough to accommodate most entrances.

If you are looking for an affordable wireless people counting solution with flexible mounting options, the Traf-Sys OmniCounter can be used as a standalone solution. The local LCD display shows the current number of counts which can be recorded at the end of each day. Or, you can enhance your people counting solution with a MIU data controller which will automatically log your pedestrian traffic data and make it available over a local area network. Add the VisiCount people counting software to compile and analyze pedestrian traffic data.

Flexible Connectivity for Your Data

The Traf-Sys MIU-1000 data controller is designed to collect, store and transmit pedestrian traffic data in entrance applications. All of your wireless people counting sensors can be connected to the MIU-1000 which will automatically log your pedestrian traffic data and make it available over a local area network. We also have wired sensors which can use the built-in RS-485 interface on the MIU-1000 to log your data.

Coupled with the Traf-Sys VisiCount or SiteCount software, your MIU-1000 will be the conduit for your pedestrian traffic data to be stored in a manageable database with an intelligent reporting interface and alert capabilities. Your MIU-1000 data controller will receive people counting statistics from your sensors over a wireless signal, record those statistics, then report the new data to your database server.

The MIU-1000 data controller has enough storage capacity to fit most facilities. Multiple MIU-1000 devices can be installed to create wireless access points that cover a large facility, or you can use Traf-Sys supplied wireless repeaters to boost the signal from a distant sensor. The flexibility of the MIU-1000 data controller makes it our most popular people counting accessory to date.

Analyze your traffic just as you do sales - by geography, time period, facility type or any other criteria that you choose.

Easy-to-use browser based reporting program with Microsoft SQL Server powered database.

Compatible with all Traf-Sys People Counting and Wireless devices.

Fully scalable Microsoft SQL Database structure allows the system to grow with your business.

Comprehensive, management level reports that can be presented in chart, tabular or drill-down formats.

Flexible data import, export and printing capabilities.

Data Hosting options available at affordable monthly rates.

The Traf-Sys VisiCount Software is designed to provide a flexible, interactive platform to get the foot traffic information you need quickly and accurately for your business. The goal is to provide all of the traffic-related information you need to support business decisions that will positively impact your profits. VisiCount features a browser-based reporting interface that can handle hundreds of sites and users.

NEW VisiCount 2.0

The VisiCount People Counter Software has been updated to provide even better reporting and analysis tools for your customer counting needs. We’ve been able to greatly improve and enhance the VisiCount People Counter software using feedback from our users and advances in software technology.

VisiCount 2.0 Features:

- New and improved web interface.
- New Report Gallery Reports.
- Site Occupancy Report. Use directional counters to estimate the current occupancy of a site at any given time of the day.
- Trend Inbound vs. Outbound Counts. Compare directional counts over time.
- Weather and Special Events reports with the ability to retrieve historical weather information from local weather stations, automatically.
- Period Performance Reports. View Traffic, Transactions and Sales information all in one report.
INTERACTIVE REPORTING

Flexibility

The Traf-Sys VisiCount Report Generator is ready to meet your customer traffic reporting needs. Simply make your selections based on your own criteria and generate the report to analyze your results. Select from multiple sites, multiple locations, entire regions, store chains or categories. The choice is yours. View customer traffic by hour, day, week, month or any user-defined period.

Compare customer traffic over time or view a trend of traffic over time. Compare two trends or view your traffic to date. Have it your way.

Conversion

Not satisfied with just customer traffic? Import your sales and transaction data to create insightful reports that display your conversion rate. Conversion data is a great tool for determining how effective your sales staff is at closing sales. Your transactions can tell you how many people made a purchase, but conversion data can point out a number of missed opportunities so you can make the most of your customer traffic and increase sales.

Higher conversion rates indicate an effective sales staff or marketing strategy. Apply methods used at high-conversion stores to your other stores and increase your revenue.

Explore Your Data

Want to see the details of your customer traffic report? VisiCount Report Generator features the ability to “Drill-Down” into your reports to see the details of the data that is shown in your report. Simply double-click on a data point and you’ll see the details of that data point.

If you are viewing a group of stores in a report, Drill-Down to see the individual stores that are in that group. Viewing a single store? Drill-Down to see the entrances at that store. This is just one of the many ways the VisiCount Report Generator allows you to explore your data.

Collaborate

Do you have a useful report that you want to share with others? With VisiCount Report Generator, you can export your reports to popular formats such as PDF, CSV or HTML and e-mail them to your colleagues.

Need to generate a regular report every day, week or month? Use the Saved Parameters feature in the VisiCount Report Generator to schedule the automatic generation and e-mail of reports on a user-defined schedule. The VisiCount Report Generator makes it easy to manage your customer traffic data so you can focus on increasing revenue.
SUPPORT

AND

HOSTING

Options

You can choose to install the VisiCount People Counting Software on your own server or let Traf-Sys host your data for an affordable monthly fee. Hosted solutions require no software to be installed at your site. The VisiCount web interface works well with popular web browser such as Internet Explorer and Firefox.

Since everything you need is installed at the Traf-Sys data center, you don’t need to worry about software updates or database maintenance. Our data center experts can maintain the data for you and reduce your IT staff requirements.

Web Services

We also have web services available so you can integrate sales and transaction information with your customer traffic data. Or, if you have your own system you would like to use, you can download data directly to your own database over the web.

Support

No matter which system you choose, our support team is ready to help. From hardware to software, installations and maintenance the Traf-Sys Support Team can assist with a level of service that is second to none in the industry.

Server Requirements

If you choose to install the VisiCount People Counting Software on your own server, the following prerequisites are required:

- Microsoft .Net Framework 2.0
- Microsoft IIS version 5.0 or higher
- Microsoft SQL Server 2000 or higher

Clients only need a web browser to access the reporting interface on your server.

Server Requirements

If you choose to install the VisiCount People Counting Software on your own server, the following prerequisites are required:

- Microsoft .Net Framework 2.0
- Microsoft IIS version 5.0 or higher
- Microsoft SQL Server 2000 or higher

Clients only need a web browser to access the reporting interface on your server.

Demco is pleased to offer discounts for 2014-2015! Please use discount code C8C011 on all your orders.

Your discounts are based on prices listed on our website at www.demco.com and will remain the same through the terms of this agreement.

Discounts under this agreement cannot be used with bids, sale catalogs or other promotions. In the event a sale price is lower than your discounted price, you will be given the best price.

*For large quantity orders, or purchases over $1,000, please contact the Demco Bid Team toll free 800.462.8709 or email quote@demco.com. You may be eligible for special bid pricing.

The discount code (C8C011 or MINITEX) goes into the field called “Contract Description”, in the checkout process it is in step 2 for Billing & Payments.
We are pleased to extend a discount of 10% on the following product lines.

- Book Covers:
- Tapes:
- Label Protectors:
- Laminates:
- Repair & Reinforcement:
- Tools & Accessories:
- Book Processing:
- Book Protection Kits:

**About Kapco Book Protection**

Our unique Easy Cover® self-adhesive book covers made life a little easier for paperbacks -- and librarians - beginning in 1987. Easy Bind® repair tape, Easy Hold™, Easy Wings™, Corners and Label Protectors soon followed and the list has been growing ever since. We continue to develop new innovations for library preservation and repair every day. Now books last longer than ever in school, academic and public libraries everywhere.

**10% discount with a minimum order of $50.**

**Members must mention “MINITEX” when ordering to receive the discount.**

**Discount will be in effect through December 31, 2015.**
